TOTAL POINTS 3

1. A CSV file saves data in a table format. What does CSV stand for?

1 / 1 point

- ☒ Comma-separated values
- ☐ Compatible scientific variables
- ☐ Calculated spreadsheet values
- ☐ Cell-structured variables

Correct

CSV stands for comma-separated values.

2. A data analyst wants to bring data from a CSV file into a spreadsheet. This is an example of what process?

1 / 1 point

- ☐ Editing data
- ☒ Importing data
- ☐ Filing data
- ☐ Normalizing data

Correct

A data analyst bringing data from a CSV file into a spreadsheet is an example of importing data.

3. A CSV file makes it easier for data analysts to complete which tasks? Select all that apply.

1 / 1 point

- ☐ Manage multiple tabs within a worksheet
- ☒ Examine a small subset of a large dataset

Correct

A CSV file makes it easier for data analysts to examine a small part of a large dataset, import data to a new spreadsheet, and distinguish values from one another.

- ☒ Distinguish values from one another

Correct

A CSV file makes it easier for data analysts to examine a small part of a large dataset, import data to a new spreadsheet, and distinguish values from one another.

- ☒ Import data to a new spreadsheet

Correct

A CSV file makes it easier for data analysts to examine a small part of a large dataset, import data to a new spreadsheet, and distinguish values from one another.
